

# Qan-ALL

all-in-one telematics solution

Improve your insight in all possible fleets, which results in better and safer driving, lower fuel consumption, lower vehicle-costs etc. With over 15 years of experience telematiQs brings you Qan-ALL, the all-in-one telematics solution!

- GPS-based trip registration
- Driver behaviour monitoring based on CANbus data
- Remote tachograph data download

### Modular system

Qan-ALL comes different modules customized to your wishes and needs. We've created 4 different modules to choose from, depending on the features you need.

Qan-ALL evo	Qan-ALL basic	Qan-ALL premium	QAB
<ul style="list-style-type: none"> <li>• Fleet management</li> <li>• Driver behaviour (based on CANbus)</li> </ul>	<ul style="list-style-type: none"> <li>• All features Qan-ALL evo</li> <li>• Driver ID</li> <li>• Tacho D8 info</li> <li>• Private / business mode</li> </ul>	<ul style="list-style-type: none"> <li>• All features Qan-ALL basic</li> <li>• Vehicle immobilization</li> <li>• Remote tacho download</li> <li>• Extra I/O's</li> <li>• Advanced installation capabilities</li> </ul>	<ul style="list-style-type: none"> <li>• Realtime feedback display (based on CANbus)</li> </ul>

Qan-ALL from telematiQs, the all-in-one telematics solution gives you GPS based trip registration, real-time driver behaviour monitoring based on CANbus and remote tachograph downloads. Our solution is **easily integrated with existing solutions** and **prepared for alternative fuel sources**. Plus, due to our **unlimited data**, you can get updates every second. In addition you can also add our Qan-ALL Awareness Box (QAB), which gives real-time feedback to your drivers.

## GPS-based Trip Registration

- Real-time tracking
- Insights into where and how long vehicles stopped
- Tracking 1.0 (based on analog key switch signal)

## Driver Behaviour Monitoring

- All tracking 1.0 features of trip registration based on CANbus data
- Detailed reports on the use of vehicles and driving style
- Driver performance reports
- Achieve fuel savings
- Suitable for wide range of vehicles
- Event-driven Protocol
- Real-time CAN Bus events
- Immobilizing (engine turn off for unauthorized drivers)

## Remote Tachograph Data Download

- Remote tachograph mass-memory and driver card download
- Tacho D8 (ISO-snapshot) info (real-time tacho data)
- Driver identification (for example iButton or NFC card)
- Online maintenance portal with API for firmware and configuration updates
- Platform independent; easy implementation
- Easy installation OBDII plug & play
- Integrated data communication (eSIM)
- Third party apps
- Low power consumption

## Qan-ALL Awareness Box (QAB)

Qan-ALL Awareness Box gives real-time feedback to your drivers to prevent unnecessary idles, over-speed, high revolutions, harsh brakes, harsh accelerations and coasting.

## On telematiQs

With over 15 years of experience telematiQs understands the needs of the market and provides solutions in automotive, agricultural, marine and rail sector. Our main focus is providing complete and optimized solutions in gathering, processing and transmission of live vehicle sensor data.
