Qreader
contactless CANbus reader

Qreader is a non- interfering and non-intrusive contactless CANbus data reader. It can collect CANbus data from all vehicle CANbus's. With Qreader, there is no need to strip wires and make a wire-to-wire soldering connections to read CANbus because herewith CANbus data is read over the isolation of the wire.

- **contactless CANbus reader**
- **Safe CANbus communication**
- **easy and quick installation**
- **no interfering when CAN_H and CAN_L are installed otherwise**
- **fits in all vehicle CANbus**
- **100% data integrity**
- **No warranty issues**
- **No liability issues**

telematiQs

With over 15 years of experience telematiQs understands the needs of the market and provides solutions for B2B telematics providers in automotive, agricultural and marine. Our main focus is on providing all-in-one solutions to unburden the telematics companies from the difficulties of gaining actionable insights from the vehicle for their end users.
